

GREENCARE OMNI

Power cleaner combining high & low pH cleaning properties

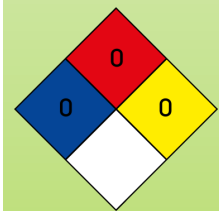

DESCRIPTION

Greencare OMNI is part of Marine Care's green line introduced into the maritime industry to invest in greener and cleaner seas. For long acids, caustics and solvents have been used to remove scaling, grease and any other build up. While these chemicals are effective cleaners they can pose danger to personnel who use them. Greencare OMNI is the first formulation that offers the full power of acids, solvents and caustics in 1 formula. Due to patented technology Greencare OMNI is able to combine the low pH of an acid and the high pH of caustics without neutralizing the other's effect making Greencare OMNI a truly unique cleaner. You can use Greencare OMNI in any environment where previously acids, caustics, solvents or any combination of the three were needed. Greencare OMNI will clean multiple stains and built up in a single, simple step. This extreme cleaning power comes with a triple zero HMIS score. This makes Greencare OMNI safe for the user, safe for your equipment and safe to store anywhere.

ADVANTAGE

Greencare OMNI does not contain acids nor caustics, is non-corrosive, not regulated and is readily biodegradable per OECD 301D. Any cleaning that once required the use of dangerous acids or caustics can now be done in a safe and green manner. This means Greencare OMNI is extremely safe for the crew. They no longer have to be exposed to dangerous cleaning chemicals.

- Non toxic
- Non acidic
- Non caustic
- 100 % bio-degradable
- Not regulated for storage & transport
- Approved by:
 - > **U.S. EPA**
 - > Marinfloc
 - > OCNS
 - > HOCNF

APPLICATION

Cleaning with Greencare OMNI can easily be done by applying it to the built up or the surface to be cleaned. Agitate by either brushing, mopping, wiping or spraying.

For more heavy build ups allow the solution to soak for several minutes. Then simply rinse off with water, possible assisted by a brush.

DIRECTIONS FOR USE

Greencare OMNI is used diluted on:

- ferro and non-ferro metals, please carry out cleaning tests upfront on aluminium and zinc.

DILUTIONS

Light to moderate cleaning	5% solution in water
Moderate to heavy deposits	25% solution in water
Heavy to severe deposits	50% solution in water

PROPERTIES

Article number	14806 / 16806
pH	11,8
Density	1,01 g/cm ³
Flashpoint	None
Physical state	Liquid

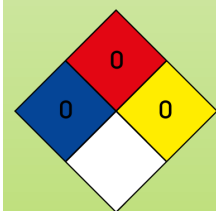

APPROVALS

- U.S. EPA approved
- Marinfloc approved OWS Compatible
- OCNS registered, 25426, for Offshore applications
- HOCNF approved, CEFAS/NEMS registered, 11101

For detailed information on safety and health, please refer to the Material Safety Data Sheet MSDS and/or product label.
